Installing Ryman Eco on Windows 7

1   Right click on the zip file.

2   Left click "Extract All" from the menu.

3   Select a destination to extract your files
        by left clicking the "Browse" button.

4   Left click on "Desktop".

5   Left click on "OK".

6   The "Select a destination" screen will
        pop up again. Left click "Extract".

7   Close any open windows and return to
        the desktop.

8   A folder now exists on the desktop named
        "Ryman Eco".

9   Find and double double left click on the
        OpenType font file in that folder.

10   A new window will open that shows a preview
        of the font. Left Click on the "Install" button.

11   A pop-up will appear that says "Windows
        needs your permission to continue".

12   Select "Continue".

13   The font selected is now installed. Confirm
        installation by opening your control panel.

14   Open the "Fonts" folder.

15   Search for the font that has just been
        installed.

16   Some programs require a system reboot
        to show fonts in the drop down menu. We
        recommend rebooting your system upon
        completion of the installation process.

Installing Ryman Eco Windows XP

You will need WinZip to unzip any PC
Compressed files. If you don't have WinZip,
you can download the free Evaluation version at
http://www.winzip.com. If you are not sure how
to use WinZip, use the Help button on the WinZip
once that it is installed.

1   Double click on the .zip font file.

2   Click "I Agree"

3   Click Extract

4   Type in "RymanEco" after the c:\

5   Click Extract

6   The font should be in a folder named
        "RymanEco" on the C drive
